

13. THREAT INTELLIGENCE FOR SOC

DATE: 15/04/2026

Aim: To learn how to utilise Threat Intelligence to improve the Security Operations pipeline.
Procedure:

1. Log into TryHackMe and open the Threat Intelligence for SOC room.
2. Study the concept and importance of threat intelligence in SOC operations.
3. Understand types of intelligence: strategic, tactical, and operational.
4. Explore sources such as Indicators of Compromise (IOCs) and threat feeds.
5. Learn how intelligence improves detection and response workflows.
6. Complete the tasks and answer the questions in the room.
7. Review the summary and confirm completion.

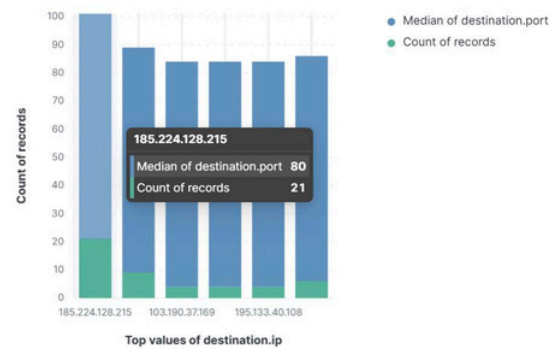

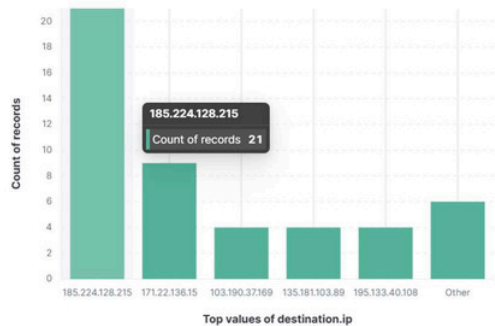

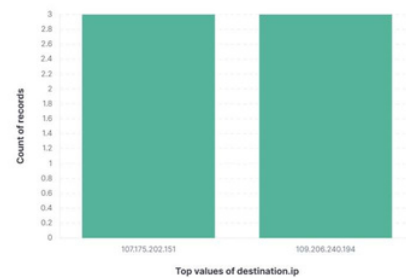

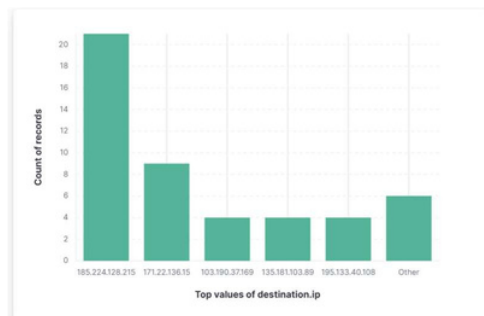

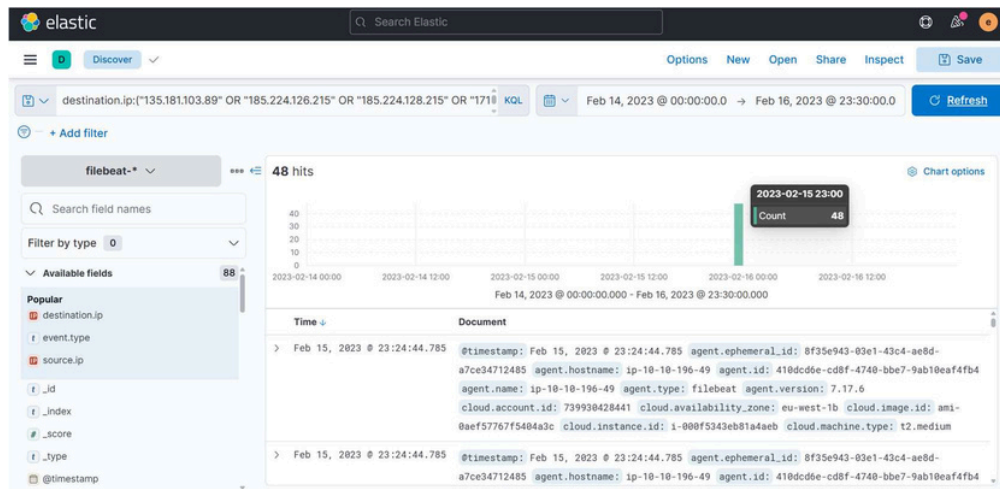

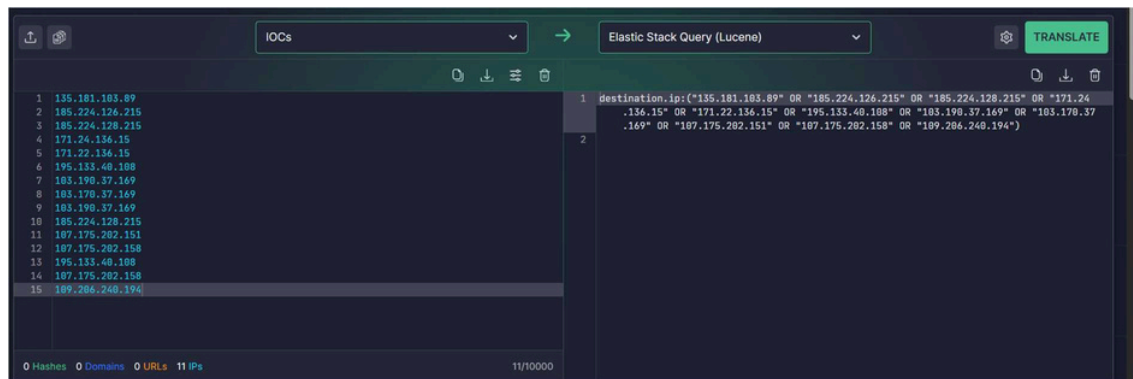

Tasks:

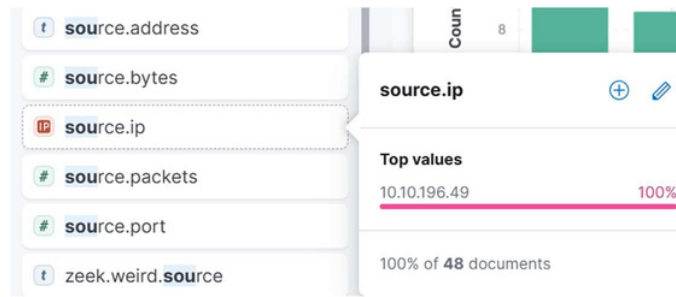

TASK 1 - Introduction

TASK 2 – Threat Intelligence Feeds

Answer the questions below

How many unique IP addresses were provided in the IOC list?

11 ✓ Correct Answer

Based on the set of IOCs, how many IOC hits were discovered in the logs?

48 ✓ Correct Answer

Out of the total number of IOCs, how many unique IP addresses were discovered in the logs?

7 ✓ Correct Answer

How many connections were made to 185[.]224[.]128[.]215?

21 ✓ Correct Answer

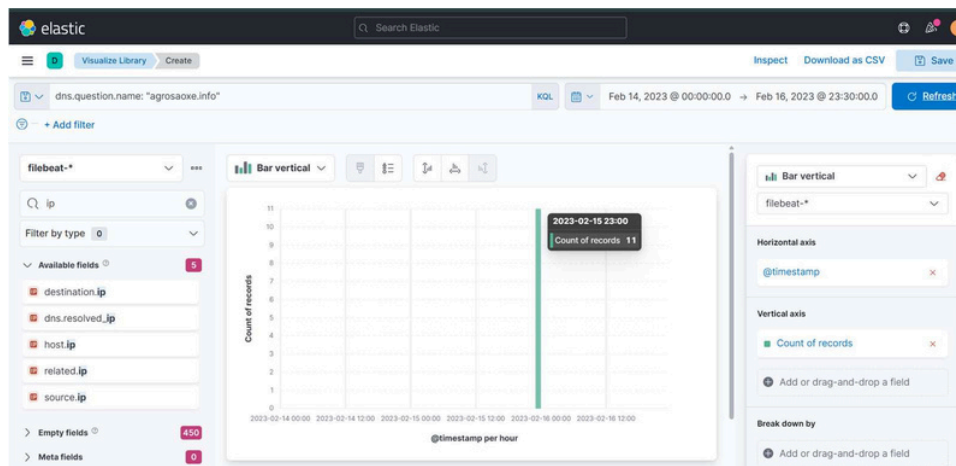

What is the IP address of the compromised host?

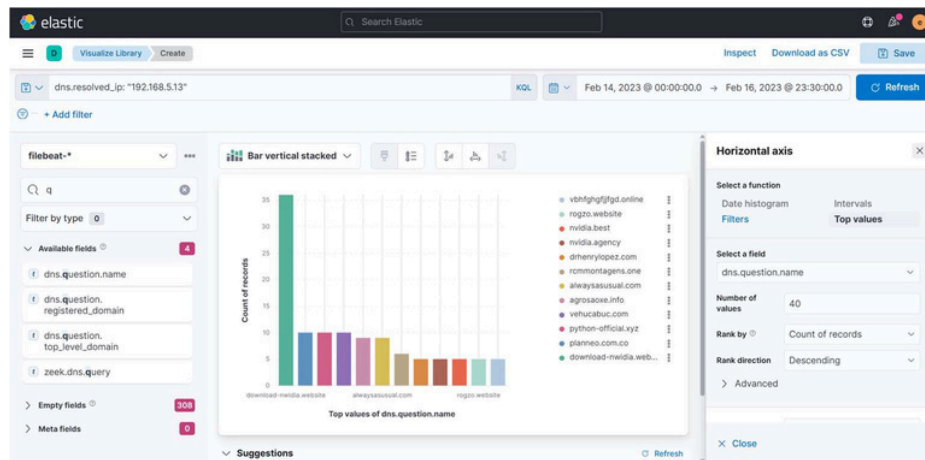

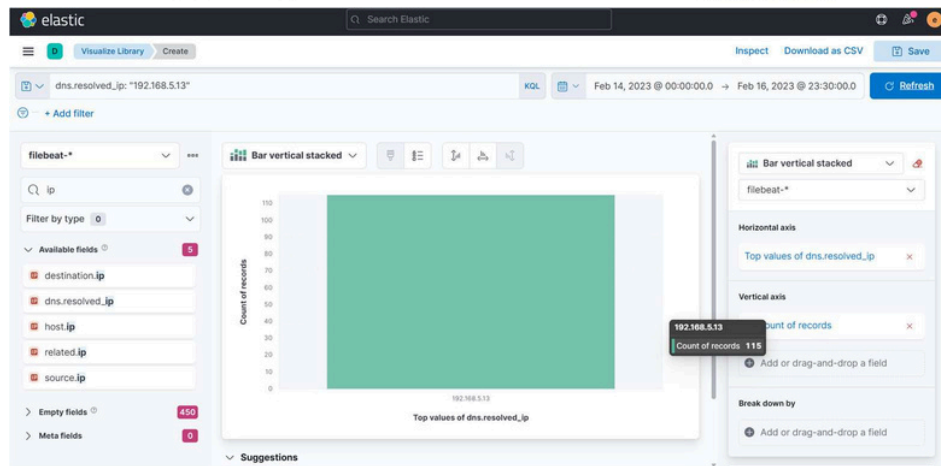

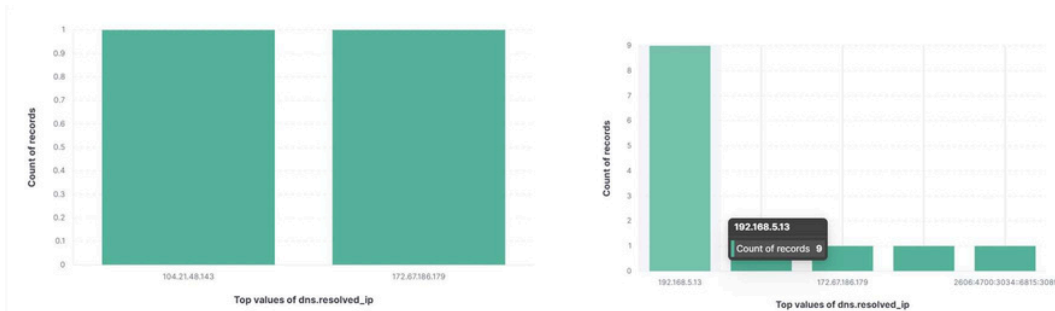

10.10.196.49 ✓ Correct Answer

What is the destination port of connections made to 107[.]175[.]202[.]151?

80 ✓ Correct Answer

TASK 3 – Intelligence Driven Prevention

Answer the questions below

How many DNS queries to agrosaoxel.jinfo have been created?

11

✓ Correct Answer

Before deploying the sinkhole configuration, what IPv4 addresses are resolved by agrosaoxel.jinfo? (format: IPs in ascending order)

104.21.48.143,172.67.186.179

✓ Correct Answer

What is the IP address used for DNS Sinkhole?

192.168.5.13

✓ Correct Answer

How many hits were caused by connections to sinkholed domains?

115

✓ Correct Answer

How many unique domains have been sinkholed?

12

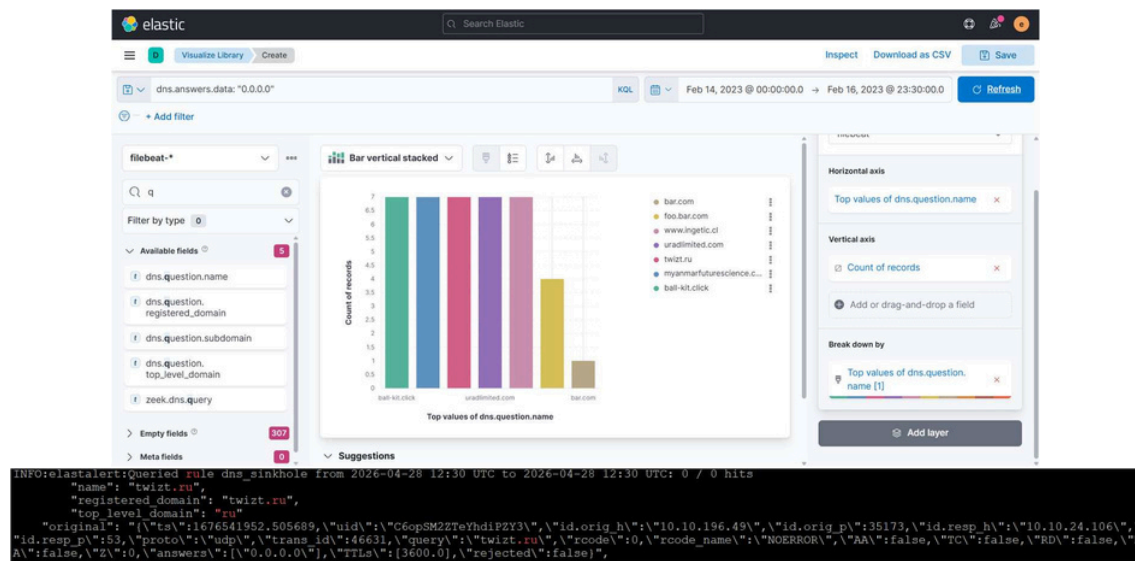

✓ Correct Answer

TASK 4 – Intelligence Driven Detection

```

alert:
- debug
description: Sigma rule for sinkholed DNS queries.
filter:
- query_string:
    query: dns.resolved_ip:"0.0.0.0"
index: filebeat-*
name: dns_sinkhole
priority: 3
realert:
  minutes: 0
type: any

```

Answer the questions below

What is the value of the alert field in the converted ElastAlert rule?

debug ✓ Correct Answer

How many alerts were generated by the rule?

40 ✓ Correct Answer

How many unique domains were sinkholed via 0.0.0.0?

7 ✓ Correct Answer

What is the sinkholed domain that has .ru TLD?

twi2t.ru ✓ Correct Answer

TASK 5 - Conclusion

Answer the questions below

Continue putting that intelligence to use!

No answer needed ✓ Correct Answer

Result:

Thus the TryHackMe room “Threat Intelligence for SOC” was completed successfully.
